

# MATERIAL HANDLING

**Siggins**

- ▶ Innovative ideas
- ▶ Exceptional results
- ▶ A total approach

See what we can do for you

# ► From DESIGN to EXECUTION to PERFORMANCE .....

## **Siggins does it right.**

We design dynamic material handling systems that grow with your business and contribute to improved profitability.

Siggins combines years of industry expertise, innovative thinking, and powerful design capabilities to create single-phase or multi-phase solutions that result in the most efficient use of your space and resources.

Starting with a thorough inventory analysis, Siggins matches your business requirements to the appropriate storage media, product flow, and picking technologies.

*Creative  
Solutions  
Since 1946*

When successful principles of layout and flow are applied, productivity is increased, labor costs are reduced, and ROI is achieved.

Siggins knows effective material handling is critical to your business. From design to execution to performance, Siggins does it right. We have the experience, the talent, and the resources. Let us know what we can do for you.

# EXPERIENCE *our*

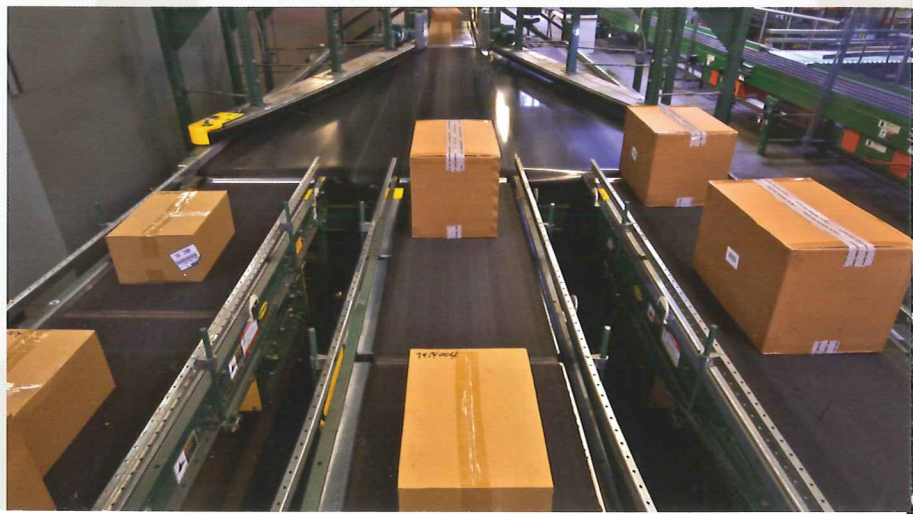

## *Capabilities*

- System Design
- System Integration
- Facilities Planning
- Project Management
- Engineering
- Equipment Specification
- Equipment Layout
- Equipment Supply
- Equipment Installation
- Inventory Analysis
- Inventory Relocation Assistance

## *Market Expertise*

- Apparel/Soft Goods
- Automotive Aftermarket
- Books/Publishing
- Consumer Products
- Electrical Supplies
- Electronics
- Hardware
- Internet/Catalog Fulfillment
- Medical/Dental Supplies
- Packaged Food Distribution
- Pharmaceutical Products
- Retail/Specialty Products
- School/Educational Supplies

MATERIAL HANDLING  
STORAGE SOLUTIONS

## Services

- Complete system design from defining your needs to solution development, budgeting, and scheduling
- Assessment of present and future inventory storage needs and correct application of storage media
- Assessment of facility parameters including available space, dock door requirements, height clearances, bay spacing, floor specifications, lighting schemes, and personnel amenities
- Detailed engineering of all systems components
- Procurement of quality products and services
- Project management for on-time, on-budget performance
- Total integration of equipment and operating systems
- Turnkey implementation

## Products

### Storage Media:

- Pick Modules
- Shelving
- Carton Flow
- Pallet Flow
- Pallet Racks
- Shelf Pick

### Mezzanines and Work Platforms:

- Multi-level
- Shelving Supported
- Rack Supported
- Structural

### Conveyors:

- Pallet Handling
- Package Handling
- Specialty
- Accumulation
- 24-Volt

### Automation:

- Sortation Systems
- Automatic Guided Vehicles
- Vertical/Horizontal Carousels
- AS/RS

### Technology:

- Conveyor and Routing Controls
- Directed Picking
  - Pick to Light
  - Radio Frequency
  - Voice
- Manifesting
